Subject: Current applications- South Quay, Hayle

Jeremy

Since we provided our advice on the 18 January 2011 it has been brought to our attention that the proposal to restore the historic Carnsew sluicing mechanism, contained within the permitted Outline Planning Application, has been omitted from the current applications. Restoration of this historic feature would have been an enhancement of the historic environment and its omission is a diminution in the benefits of the scheme.

I would be grateful if you could regard this as an addition to our formal advice submitted on the 18 January 2011. Apologise for the omission.

Regards
Simon
